

## Grade One

Students in grade one learn about personal safety and their body's major organs. They begin to understand how behaviors can impact health and wellness now and in the future. Students begin to relate choices with consequences, which relates to responsible decision making and supports social and emotional development. They begin to examine the influence of social media (increasing self-awareness as well as social awareness) on health decisions (responsible decision making) and to identify ways to access reliable information. They exhibit respect for self, others, and the environment, which supports social and emotional development specifically in terms of self-awareness and social awareness.
